SUMMARY

Frontend Engineer with **3 years** of experience developing front-end applications. Experienced in building scalable HRMS platforms, workflow automation systems, reusable component architectures, and secure Role-Based Access Control (RBAC) solutions. Proficient in React.js, Next.js, TypeScript, JavaScript, REST API integration, Oracle SQL, and PL/SQL and working on oracle based enterprise applications. Demonstrated ability to deliver business-critical features across payroll, claims processing, employee lifecycle management, and workflow automation while collaborating within Agile development environments.

EXPERIENCE

Tech Mahindra

Aug 2023 – Jun 2026

Software Engineer

Bengaluru, India

- Developed and maintained 5+ React.js-based **HRMS applications** serving **5000+ employees**, delivering solutions for payroll management, claims processing, employee transfers, benefits administration, and employee lifecycle workflows.
- Built 14+ reusable React.js and TypeScript components and integrated Oracle-backed REST APIs across modules including Loans & Advances, Leave Encashment, Medical Claims, Remittance, and Employee Transfer, reducing duplicate development effort and improving maintainability.
- Built responsive user interfaces using React Router, Material UI, and Ant Design, ensuring consistent navigation patterns, accessibility, and user experience across multiple enterprise modules.
- Implemented **Role-Based Access Control (RBAC)** for screen-level permissions, enabling granular access management for sub-users and administrators while ensuring compliance with business security requirements.
- Designed and executed the development of a **PL/SQL package** to resolve business-rule inconsistencies in fringe benefit calculations, improving data accuracy, automating complex validation logic, and preventing financial misuse across employee benefit workflows.
- Collaborated within Agile development teams, participating in sprint planning, daily stand-ups, backlog discussions, and feature delivery cycles.
- Worked closely with business analysts, QA engineers, and database developers to deliver production-ready features across multiple HRMS modules and release cycles.
- Contributed to frontend architecture design, reusable component library standards, and application-wide UI consistency, improving maintainability and accelerating feature development across multiple HRMS modules.

Elysian Corptech

Feb 2023 – Jul 2023

Web Developer

Remote

- Developed an **Order Management System** supporting order lifecycle management, fulfillment workflows, and exception handling.
- Built interactive **sales analytics dashboards** featuring real-time reporting, business visualizations, and trend analysis.
- Enforced **Service Request Management** workflows with SLA tracking, escalation handling, and support analytics.
- Delivered responsive interfaces with dynamic forms, validation logic, search, filtering, and data-driven reporting modules.

EDUCATION

B.Tech in Computer Science & Engineering

Ajay Kumar Garg Engineering College, Ghaziabad

Aug 2019 – Jun 2023

CGPA: 7.96/10 | Perc: 76.18%

Senior Secondary School

Shri Ji Baba Saraswati Vidya Mandir, Mathura

2019

Perc: 86.17%

SKILLS

Frontend

React.js Next.js TypeScript JavaScript ES6+
HTML5 CSS3 Tailwind CSS React Router
Material UI Ant Design

Concepts

React Hooks Context API State Management
Redux Responsive Design
Component Architecture Server Side Rendering

Backend

Node.js Express.js REST APIs JWT Auth
RBAC

Databases

MongoDB MongoDB Atlas Oracle SQL
PL/SQL

Cloud & Tools

AWS Azure Git GitHub CI/CD
Figma Axios Render

AI

Generative AI Prompt Engineering
OpenRouter API LLM Integration

Engineering

PERSONEL PROJECTS

NoBlindSpot — Full-Stack AI Knowledge Management Platform

<http://noblindspot.onrender.com/> |  <https://github.com/shad0waryan/NoBlindSpot>

React.js · Vite · Tailwind CSS · Node.js · Express.js · MongoDB · JWT · OpenRouter API · Resend

- ▶ Built a full-stack platform enabling users to create, organize, and visualize **interconnected knowledge maps**.
- ▶ Integrated **Generative AI** via OpenRouter API for structured node generation, topic relationships, summaries, and learning pathways using dynamic prompt generation.
- ▶ Used **JWT authentication** with email verification, password reset, and protected routes via Resend email services; deployed on Render with MongoDB Atlas.

Shad0wbucks — Starbucks Frontend Clone

<https://shad0wbucks.netlify.app/> |  <https://github.com/shad0waryan/shad0wbucks>

React.js · React Router DOM · Swiper.js · Tailwind CSS · Firebase

- ▶ Made a fully functional Starbucks-inspired frontend with authentication, cart management, and responsive UI; dynamic routing via React Router DOM and carousels via Swiper.js.
- ▶ Integrated **Firebase Authentication** for secure email/password login and designed reusable components optimized across device sizes.

FluxCart — Next.js E-Commerce Platform

<https://fluxcart-0ptw.onrender.com/> |  <https://github.com/shad0waryan/fluxCart>

Next.js · TypeScript · Tailwind CSS

- ▶ Built an e-commerce app with product browsing and cart management leveraging **Next.js SSR** and file-based routing for performance and SEO.
- ▶ Built reusable TypeScript-based components, along with type-safe API contracts, and leveraged Next.js Server-Side Rendering (SSR) to improve maintainability, SEO, and application performance.

ACHIEVEMENTS

- ▶ **350+ problems** solved on LeetCode & GeeksforGeeks.
- ▶ Built & deployed multiple production-ready apps including an AI-powered SaaS platform.
- ▶ Delivered enterprise features for applications used by **5000+ active users**.

Extras

- ▶ **Languages** - English & Hindi
- ▶ **Interests** - Music, Guitar, Badminton, Video Editing
