PROFILE

Web Developer with hands-on experience in building fast, responsive web applications using React and modern JavaScript. Strong programming foundation in C++ and experience working with databases like MongoDB and Oracle SQL. Focused on writing clean, efficient code and continuously improving through real-world projects.

PROFESSIONAL EXPERIENCE

Tech Mahindra

SOFTWARE ENGINEER

August 2023 - Present

- Developed the frontend of the HRMS module using ReactJS and integrated it with the Oracle database, enabling users to interact directly with the system for HR-related information, significantly improving operational efficiency
- Designed and implemented a PL/SQL package to resolve a critical issue where users were exploiting fringe benefit calculations due to a system bug, ensuring accurate benefit allocation and preventing misuse
- Developed the frontend interfaces using ReactJs for multiple modules including Loans/Advances, Leave Encashment, Medical Claims, Remittance Invoice Reports, and Employee Joining/Transfer, ensuring a consistent and user-friendly experience across the system
- Implemented the Screen Access module's frontend using ReactJs and facilitated its database integration, empowering users to control sub-user access to application screens, thereby enhancing system security and role-based control.

Elysian Corptech

Web Developer

February 2023 - July 2023

- Built a comprehensive Order Management System supporting order placement, tracking, fulfillment, and exception handling
- Designed and integrated Product Assortment features enabling dynamic product catalog management and retailer-specific assortment configurations
- Developed an interactive Sales Dashboard with real-time analytics and visualizations (e.g., bar charts, trend lines, pie charts) to track sales performance, regional trends
- Implemented a Service Request Management module for handling customer issues, SLA tracking, escalation workflows, and support analytics.

SKILLS

Skills: JavaScript, TypeScript, PL/SQL, React.js, Next.js, Node.js, AWS, Git, MongoDB, Agile, Axios, Asana, Bash, C/C++, tailwind, Figma, REST, SAAS, HTML, CSS, REST APIs, CI/CD, 3-tier architecture, software development life cycle

Interests: Badminton, Playing Guitar, Video Editing

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad

Bachelors in Technology, Computer Science

August 2019 - June 2023

GPA: 8.04

Shri Ji Baba Saraswati Vidya Mandir, Mathura

Senior Secondary School

2019

GPA: 86.17

Kanha Makhan Public School, Mathura

High School

2017

GPA: 10

CERTIFICATIONS

MERN Stack Developer - Froyo Technologies

Cloud Computing with AWS - Froyo Technologies

Artificial Intelligence - Verzeo (Authorized by Microsoft)

Command Line in Linux - Coursera

Developing soft Skills and personality- NPTEL

Enhancing soft skills and personality - NPTEL

Introduction to industry 4.0 and Industrial Internet of Things - NPTEL

Speaking effectively - NPTEL

PERSONAL PROJECTS

Shad0wbucks

- Tech Stack: React.js, React Router DOM, Swiper.js, Tailwind CSS, Firebase
- A fully functional frontend clone of Starbucks built with React
- Implements dynamic routing using React Router DOM
- Smooth product carousels with Swiper.js
- Responsive design powered by Tailwind CSS
- Features include add to cart, item deletion, and login
- Secure email/password authentication with Firebase Auth
- [Link to project](#)

FLUXBASKET

- Tech Stack: Next.js, Tailwind CSS, Typescript
- Clean and intuitive UI/UX
- Fully functional cart management system
- Leverages Next.js features like file-based routing and
- server-side rendering for performance
- Ideal for demonstrating component-based architecture
- and stateful logic
- [Link to project](#)

TRIVIATAP

- Tech Stack: React.js, HTML, CSS, JavaScript
- Built a quiz app using React with dynamic state management
- Conditionally renders components based on quiz
- progress and user interaction
- Calculates and displays final score at the end of the quiz
- [Link to project](#)

XOCLASH

- Tech Stack: C++, SFML (Simple and Fast Multimedia Library)
- Custom game board rendering using SFML graphics
- Emphasis on real-time input handling, turn-based logic, and OOP principles in C++
- [Link to project](#)
